## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a method for transmitting a still image via a compressed video transport by determining the quality, classified in class 375, subclass 240.01.
  - II. Claims 19-24, drawn to a method for calculating DCT coefficients, classified in class 375, subclass 240.2.
  - III. Claims 25-26, drawn to a method for calculating a synchronization frame, classified in class 375, subclass 240.28.
  - IV. Claims 27-34, drawn to a method of setting an initial quality of an image part, classified in class 375, subclass 240.03.
  - V. Claim 35, drawn to a method of transmitting an image by generating a dad block, classified in class 375, subclass 240.24.
  - VI. Claim 36, drawn to a method of calculating a coefficient change value, classified in class 375, subclass 240.18.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I-VI are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility such that each subcombination claimed a specific part of the invention as an independent invention.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2613

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
